NAB - Las Vegas, NV (April 24, 2006) – Gangway 16 is a compact, easy-to-use, low cost, 16 port RS-422 Gang Roll Switcher. The front panel provides a lighted button for clear indication as to the status of each machine, a gang roll button to quickly enable all machines, 3 User Preset Groups and a Tally Select button. A front mounted RS-422 port provides a convenient connection for a jog/shuttle remote or other device.

Gangway has 16 RS-422 ports on the rear panel and a rear mounted RS-422 control input. The rear panel also includes 2 - 25 pin D-Sub connectors for GPI I/O, a power switch and an additional interface slot. An optional interface card can act as a Master Input, connecting the Gangway 16 to 10/100 Ethernet, USB, RS-232 or RS-422. This can be used to remotely change the switching configuration of the Gangway 16 itself or as the source of commands for controlling connected VTRs, DDRs or Servers. You can communicate with Gangway-16 over LAN or over the internet, for remote control and switching functionality.

“The compact and cost-effective GangWay 16 will be ideal for remote truck or studio applications”, says Chuck Thompson, Vice President and General Manager of JLCooper Electronics.

JLCooper Electronics is a twenty-five-year-old company that designs and manufactures a complete line of control, synchronization, interfacing and automation products. Thousands of leading companies in audio and video production, television and radio broadcast, animation, sound reinforcement, lighting, aerospace, education, scientific research, medical, recording artists and others rely on JLCooper products every day.

JLCooper products are sold through factory representatives, distributors and dealers worldwide.
