JLCooper Ships MCS-3000XL – Next Generation Motorized Fader Controller
New Model Features Hi-Resolution RGB LCD Buttons for Track Status and Information
<http://www.jlcooper.com/pages/mcs3000xl.html>

NAB - Las Vegas, NV (April 24, 2006) – JLCooper announces the MCS-3000 XL is a next generation 8 Channel Fader Controller, featuring high quality, touch-sensitive, 100 mm motorized faders and 8 backlit LCD display buttons.

Building on the proven MCS-3000x, this new model has the potential to display channel labels, color coded track arming status and other mission critical information, using revolutionary state-of-the-art RGB LCD keyswitches to display 64 colors and up to 32 characters of text and graphics.

Built in MIDI ports with optional USB, 10/100 Ethernet, RS-232 and RS-422 Interface Cards provide the connections to host systems or stand alone control.

JLCooper Electronics is a twenty-five-year-old company that designs and manufactures a complete line of control, synchronization, interfacing and automation products. Thousands of leading companies in audio and video production, television and radio broadcast, animation, sound reinforcement, lighting, aerospace, education, scientific research, medical, recording artists and others rely on JLCooper products every day.

JLCooper products are sold through factory representatives, distributors and dealers worldwide.
