

KeyShot - Compact Desktop Control Palette

KeyShot is a new addition to our line of control products using remotely relegendable push-button switches which allow the user to instantly recognize the key function. It's unique, compact shape uses minimal space and it fits behind most computer keyboards.

KeyShot features 10 remotely relegendable, multi-color, backlit liquid crystal display (LCD) push-button switches. The LCD's can display 36 x 24 pixel bitmaps or 3 lines of text (6 characters per line), or a combination of text, graphic symbols or animation. They can alert users to changing operating conditions by showing any of 8 different colors. This enables a customized user interface that changes to suit the task at hand to help users work faster and with fewer mistakes. Other controls include 13 lighted function keys and a rotary encoder. The KeyShot is capable of accepting RS-232, RS-422, USB or Ethernet Interface Cards.

It provides instant audio or video playback triggering in broadcast, post production and other professional applications. Other uses include control systems, call centers, financial services, telecommunications, industrial controls, office automation and medical systems.

KeyShot sits behind your computer keyboard

Physical Specifications

- Size - 11.5" x 8.0" x 2.5"
- Weight - 6 lbs.

RackShot - Rackmount Control Palette

RackShot provides the exact same control capabilities as our KeyShot in a convenient single space, 19" rack mount package. It connects via RS-232, RS-422, USB or Ethernet and to

provide instant audio or video clip playback triggering in broadcast, post production and other professional applications where relegendable push-button switches in a rack are useful.

Physical Specifications

- Size - 9.25" x 6.25" x 2.0"
- Weight - 3 lbs.

MCS-QuickShot - MCS-3000 Series Command Palette

MCS-QuickShot is a compact version of our MCS-ClipShot. It offers the same controls as the KeyShot and RackShot, in an MCS-3000 Series package. It accepts MCS-3000 Series Interface Cards including RS-232, RS-422, USB and Ethernet, and it has a built in interface for communicating directly with other Media Command Station components.

It can be physically coupled with other MCS-3000 Series units using an optional joiner kit.

Physical Specifications

- Size - 9.25" x 6.25" x 2.0"
- Weight - 3 lbs.

KeyShot features 10 remotely relegendable, multi-color, backlit LCD push-button switches. Other controls include 13 lighted function keys and a rotary encoder. Ethernet Interface Cards.

MCS-ClipShot - Tactile Control Palette

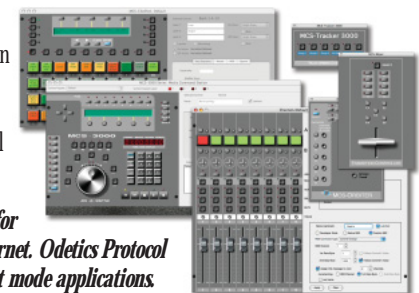

MCS-ClipShot is a switch palette with 40 relegendable multi-colored 24 x 32 LCD buttons (capable of displaying text and graphics), 20 function buttons and a 2 x 40 backlit LCD display with new features for 2004.

It can be used as a stand-alone controller or interfaced with other MCS-3000 Series modules to form a larger console. It has 2 card slots for interfacing via RS-232, RS-422, USB, Ethernet, Quad 422/9Pin and GPI.

MCS-ClipShot provides instant audio or video Playback Triggering for broadcast, post production and other professional applications. It's LCD buttons can also function as a QWERTY keyboard, eliminating the need for a traditional keyboard for naming clips.

New advanced features in MCS-ClipShot provide direct support for Doremi and other Video Disk Recorders and Servers via RS-422 or Ethernet. Odetics Protocol also supported. Stand alone support for MCS-Wiper is now possible in some host mode applications. New Macintosh support for our USB interface, now available for any OSX applications.
